

LIONS OF MICHIGAN FOUNDATION **FREE** VISION SCREENING FOR CHILDREN

SPONSOR: _____

WHEN: _____

WHERE: _____

WHO: Children, Especially Pre-School and Elementary School Children.

WHAT: Through Project KIDSight, we aim to detect potential vision disorders in children that can cause permanent vision loss when treatment is delayed. Your child's vision will be tested with an electronic vision screener (hi-tech camera) that will quickly (1 second) and accurately determine whether your child's vision is a Pass or a Refer. Children that receive a Refer result have a potential vision problem and should be examined by an ophthalmologist or optometrist as soon as possible.

WHY: 5% of all preschool age children experience vision loss from an undetected vision disorder, and treatment options increase when vision problems are detected early in a child's life. Normal vision can usually be restored with eye glasses, contact lenses and sometimes patching when vision problems are detected in young children.
